

SSINFOTEK

POWERED BY KNOWLEDGE . DRIVEN BY VALUES

“ To provide high quality solutions by leveraging technology and delivering extraordinary business value. ”

**Company
Profile**

The SSINFOTEK Difference

A technology-focused company with a customer-centric attitude, made up of people who like to solve complex technical problems. Since 2000, the organizations that collaborate with us have benefited from every wave of IT innovation.

Here are just a few reasons why:

- **Commitment to Integrity:**
Maintain the highest standards of ethical behavior
- **Commitment to Customers:**
Exceed customer expectations for quality and service
- **Commitment to Each Other:**
Maintain an environment of respect, trust, teamwork and open communication

Our Mission

To be recognized as the company that compels the interest for most talented technical people in the world, who revolutionize the development and delivery of enterprise-transforming business applications.

Attract and continue to retain the most dedicated and talented workforce by providing a safe environment and an opportunity to learn and grow.

Achieve rapid growth through teamwork and business excellence, creating significant value for our Customers.

We are committed to continuous improvement and an unrelenting focus on customer satisfaction.

Our Services

Our focus and strengths are devoted into providing professional services in the area of information technology.

Application Development

Technology leadership is a critical driver for hi-tech product companies. The challenge for companies that build and market application products is to translate their technology leadership and vision to features and functionality that bring value to end-customers.

What SSINFOTEK can do for you in the areas of Application development:

- Optimize applications from new, aging, and legacy application systems
Increase your ability to compete globally by integrating leading Internet-enabled applications
- Improve your response to customer needs by keeping critical enterprise software up-to-date
- Speed the pace of technological change within your organization while minimizing costs
- Recapture the business logic inherent in legacy applications

E-business Solutions

With the ever-growing need to prove a competitive edge in the new economy, corporations around the world need to provide nonstop services to scale their business. SSINFOTEK offers expertise in this area to help build rapidly deployable applications that enable enterprises to focus on uncovering new business opportunities.

Our E-Business services include:

- IT Architecture and Design
- Application Development
- Legacy Web Integration
- Web Security
- EDI / Internet EDI Implementation

Enterprise Architecture Integration

New technologies that promise to address the challenges of enterprise architecture arrive at an ever-increasing pace. The typical I.T. organization faces a constant barrage of hype on the latest tools and trends. SSINFOTEK offers a full range of enterprise architecture services including rapid assessment, corporate technology strategy, infrastructure planning, and middleware implementation.

Our range of enterprise architecture services can be configured to meet your specific needs. We help you do the following:

- Integrate systems and processes across organizational and geographic boundaries
- Gain timely visibility into operational and strategic data
- Translate business requirements into a technology blueprint designed for flexibility, extensibility, and cost-effective performance
- Adapt existing technology investments to meet changing business requirements quickly and effectively
